

# SKITRE ELEVATE: AI DEMYSTIFIED

Unlock the power of AI

Unlock the power of AI in your daily life and profession. This workshop is designed as the ultimate AI playbook, providing practical insights whether you are a student, entrepreneur, or simply looking to make life easier. We explore cutting-edge tools like *ChatGPT*, *Grok*, and *Perplexity* to help you streamline tasks and boost your skills effortlessly. From drafting professional emails to brainstorming creative ideas, you will learn how to transform AI into your everyday superpower.

## Cover Topics

### 1. Basics of AI: Demystifying the Technology

- *What is artificial intelligence?* An introduction to AI as the technology used to make intelligent machines and computer programs that can learn, adapt, recognize patterns, and solve problems.
- *Two Flavors of AI:* Understanding the difference between Symbolic AI (based on logic and reasoning) and Machine Learning (figuring out rules from messy, real-world data).
- *The Rise of Generative AI:* A look at how tools like ChatGPT, Grok, and Perplexity use massive datasets to generate human-like text, images, and code.

### 2. How AI Makes Your Day-to-Day Life Easy

- *Your Ultimate Virtual Assistant:* Using AI to manage daily tasks, set reminders, and automate your personal workflow.
- *Smart Living & Wellness:* Leveraging AI for travel planning (instant itineraries), smart budgeting (analyzing spending habits), and wellness coaching (personalised fitness and meal plans).

### 3. Master Prompting for Different Tasks

- Learn the *4-step formula* (Persona, Task, Context, Format) to produce precise and reliable information.
- *Mail Maestro (Emails):* Harnessing AI to draft personalised, structured, and professional emails.
- *Presentation Powerhouse (PPT):* Generating detailed outlines for presentations in seconds using voice or text commands.
- *Document Decoder (Docs):* Using the "Summarise" feature to digest long articles, reports, or books into clear bullet points.
